Message from the Guest Editors

Non-coding RNAs larger than 200 nucleotides are referred to as long non-coding (lnc) RNAs, which are markedly heterogeneous in size and cellular function. The current high throughput technology such as RNA-seq describes lncRNAs at an unprecedented level with tightly regulated expression dependent on the tissue of origin or disease condition, however, the majority of these genes is not yet functionally characterized. lncRNAs have been shown to play a fundamental role in cell growth, proliferation, cell death, invasion and metastasis formation as well as the regulation of the expression of many molecules. Currently many attempts are focusing on the use of lncRNAs as biomarkers for various diseases.

We invite investigators to contribute original research articles, as well as review articles, that will stimulate the continuing efforts in the research into lncRNAs. This Special Issue is focused on, but not limited to, the variations in expression, post-transcriptional modifications, structure, interactions, etc., of lncRNAs contributing to the regulation of cellular inflammatory functions and chronic inflammatory diseases. Both reviews and original research articles are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
