Molecular Pathogenesis and Molecular Therapy of Lymphoid Malignancies

Guest Editors:

Dr. Dalia El-Gamal
Eppley Institute for Research in Cancer and Allied Diseases, University of Nebraska Medical Center, Omaha, NE 68198, USA

Dr. Christopher D'Angelo
UNMC Department of Internal Medicine, Fred & Pamela Buffett Cancer Center, Omaha, NE 68198, USA

Deadline for manuscript submissions:
closed (15 May 2023)

Message from the Guest Editors

This Special Issue welcomes Original Research articles, Reviews that address the complex pathogenesis and targeted molecular therapies of B-cell, T-cell or NK-cell malignancies. Manuscripts that highlight molecular disease factors (genetic and/or epigenetic), oncogenic pathways within the tumor and its microenvironment, and introduce or evaluate novel therapeutics targeting these pathways are invited. The following topics are of particular interest: <false,>Studies that characterize cells (tumor and/or bystander cells), extracellular elements (matrices, soluble factors, metabolites), and their crosstalk within the microenvironment of lymphoid malignancies

Mechanistic studies of oncogenic events (genetic or epigenetic) that contribute to disease progression and/or drug resistance

Studies focusing on signaling pathways within the tumor microenvironment that support malignant cell growth and/or evasion of anti-tumor immunity

Translational and studies investigating novel molecular-based therapeutic approaches

Other studies pertaining to the overarching theme of this Special Issue as outlined above

On behalf of the Editorial Board at IJMS, we look forward to your contributions.

Special Issue

Editor-in-Chief

Prof. Dr. Maurizio Battino
Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
