Systems Biology, University of  
Turin, Via Quarellò 15/a, 10135  
Turin, Italy

**Dr. Margaret Ahmad**

Photobiology Research Group,  
Sorbonne Universités - UPMC  
Paris 6 - CNRS, UMR8256 - IBPS, 7  
Quai St. Bernard, 75005 Paris,  
France

Deadline for manuscript  
submissions:

**31 October 2024**

### Message from the Guest Editors

Dear Colleagues,

Earth magnetic field or geomagnetic field (GMF) is an environmental component, and changes in GMF intensity have been shown to influence many biological processes. Three different mechanisms of magnetoperception have been described: a mechanism involving radical pairs, which has been demonstrated both in animals and in plants; the presence of MF sensory receptors present in cells containing ferromagnetic particles, as has been shown in magnetotactic bacteria; and the detection of minute electric fields by electroreceptors in the ampullae of Lorenzini in elasmobranch animals. The theory underlying the radical pair mechanism predicts that MFs similar in strength to the GMF are too weak to trigger cellular biochemical reactions; however, these MFs are able to interact with short-lived reaction intermediates that affect the reaction rates of biochemical reactions.

The primary aims of this Issue are to present information on magnetoreception and magnetoperception by exploring biochemical, molecular and physiological aspects of living organisms responses to varying MF: from below the GMF values to high-intensity MFs.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
