Deadline for manuscript  
submissions:

**closed (20 July 2022)**

Early diagnosis of Alzheimer's disease (AD) and the discovery of therapies to halt or significantly slow the course of the disease are daunting challenges facing our society. A deeper understanding of the molecular basis underlying the anatomopathological and clinical changes characteristic of AD would allow us to change the paradigm and identify promising therapeutic targets for these patients. Examples of molecular pathways currently under active investigation would be age-related defects in autophagy capacity or oxidative stress conditioned by external stimuli, such as pollution or diet. Additional hypotheses would include changes in inflammatory molecules related to innate or adaptive immunity and a number of alterations in the molecular processes that influence adult neurogenesis. All the above must be considered without forgetting the molecular machinery that epigenetic mechanisms use to combine environment and genetic susceptibility in developing AD. All these processes and others have a molecular translation that needs to be elucidated in order to better understand the disease and seek therapeutic alternatives for AD.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maurizio Battino

Department of  
Odontostomatologic and  
Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of  
Medicine, Università Politecnica  
delle Marche, Via Ranieri 65,

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
