Deadline for manuscript
submissions:

closed (28 February 2018)

Message from the Guest Editor

Dear Colleagues,

Mesothelioma is a rare aggressive cancer developing from the mesothelium. Recent molecular analyses have defined four different types of mesothelioma on the basis of gene expression, and two molecularly-defined groups based on prognosis. This Special Issue explores potential mechanisms causing this heterogeneity.

Announced papers will include heterogeneity sources: learned from experimental animal models; from 3D spheroids, in the NF2/Hippo pathway signaling; tumor microenvironment. We are open to suggestions which will cover other aspects contributing to heterogeneity

Dr. Emanuela Felley-Bosco

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
