Metal Metabolism in Bacteria

Guest Editor:

Prof. Dr. Christopher Rensing

Institute of Environmental
Microbiology, College of
Environment and Resources,
Fujian Agriculture and Forestry
University, Fuzhou 350002, China

Deadline for manuscript
submissions:

closed (28 June 2019)

Message from the Guest Editor

Metals have undergone changes in speciation and bioavailability during Earth's history. Consequently, they have greatly influenced the evolution of life. In this Special Issue, emphasis will be placed at the interface of metals, such as copper and zinc, and microbes and how these interactions shape survival and virulence. In addition, the behavior of metals and metalloids in the environment will be explored. If possible speciation of metals will be linked to genes and metal resistance determinants. Special emphasis will also be given to metal resistance determinants of less studied metals, such as tellurium, chromium and antimonite.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
