Message from the Guest Editor

All metal-containing joint replacement prostheses release metal debris into the local and systemic tissue environments. This debris arises as a result of wear and corrosion at the prosthesis surfaces. Local adverse tissue responses to this released metal have resulted in a substantially higher prosthesis failure rate in prostheses using cobalt–chromium at the bearing surfaces and other modular interfaces. Case reports of severe systemic illness involving cardiac, neurological, and other distant organ systems have also been associated with excessive wear or corrosion of cobalt–chromium alloy-containing prostheses. Despite this burden of clinical disease associated with metal ion exposure, the magnitude of the underlying risk associated with metal-on-metal bearings and interfaces remains unclear and the relevant molecular pathways are poorly characterized.

This Special Issue will focus on recent advances in our understanding of “Adverse Reactions to Metal Debris”, including new insights into the epidemiology as it relates to disease mechanisms, pathogenesis, and molecular biology of ARMD.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
