

Extreme Microorganisms in the Nitrogen Cycle

Guest Editors:

Prof. Dr. Rosa María Martínez-Espinosa

Department of Agrochemistry and Biochemistry, Faculty of Science, University of Alicante, E-03080 Alicante, Spain

Dr. Carmen Lucía Pire-Galiana

Department of Agrochemistry and Biochemistry, Faculty of Science, University of Alicante, 03690 San Vicente del Raspeig, Spain

Mr. Javier Torregrosa-Crespo

Department of Agrochemistry and Biochemistry, Faculty of Science, University of Alicante, Alicante, Spain

Deadline for manuscript submissions:

closed (30 November 2019)

Message from the Guest Editors

The nitrogen cycle is one of the most important biogeochemical cycles on the planet and involves a wide range of nitrogen species and biochemical transformations. Microorganisms play a key role in this cycle. Recent investigations have revealed that N-cycle is relevant in marine and other extreme environments like salterns, very dry deserts, volcanoes, deep ocean trenches and upper atmosphere.

Articles (original research, commentaries, opinions, reviews) to be published in this Special Issue of *IJMS* should contribute to understanding the role of moderate and extreme microbes in the N-cycle from interdisciplinary approaches.

Topics include, but are not limited to:

- N-cycle pathways (biochemical, molecular biology, microbiological, ecological approaches)
- Nitrogen assimilation, fixation and respiration
- Nitrogenous gasses emissions and climate change
- Ammonification/nitrification
- Dissimilatory nitrate reduction to ammonia
- Anammox and denitrification

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
