## Microcirculation in Inflammation

Guest Editor:

### Prof. Dr. Christian Lehmann

Department of Anesthesiology, Dalhousie University, Halifax, NS, Canada

Deadline for manuscript submissions:

closed (31 July 2019)

# **Message from the Guest Editor**

Dear Colleagues,

Microcirculation plays important roles physiology and in a multitude of pathological conditions. Microvascular leukocyte endothelial interactions and specific changes in blood flow are a hallmark of the innate immune response in inflammation. However, it requires sophisticated methods to study the microcirculation experimentally and it is challenging to obtain relevant data in humans. This Special Issue will review classical and modern microcirculatory methodology and present novel experimental and clinical results regarding changes within the microvasculature during local and inflammatory processes. The understanding of those mechanisms will open new avenues for the development of anti-inflammatory drugs.

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
