Shizuoka Graduate University of
Public Health, Shizuoka 420-
0881, Japan

Deadline for manuscript
submissions:

closed (31 December 2017)

Message from the Guest Editor

Dear Colleagues,

The acute infection of pathogens elicits strong immune responses in the host to clear invading pathogens and infected cells. These innate and adaptive immune responses lead to the eventual recovery of most infected individuals. Numerous proteins from pathogens, signal molecules, receptors, cytokines, and chemokines have been known to be involved in this process. Each pathogen has unique ways to infect, and has employed mechanisms to escape and/or evade the host immune responses. In some cases, acute symptoms develop into fatal systemic deterioration showing coagulation abnormality or immunological tolerance. Systemic reactions can lead to poor understanding of underlying biological events during the acute phase of immune response. Emerging knowledge of new inflammatory molecules revealed a novel aspect of the pathophysiology of acute infectious diseases. In this Special Issue, we will focus on the novel molecules involved in infection to have a better understanding of infectious diseases.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
