Message from the Guest Editor

Muscular dystrophies (MDs) are diseases predominantly affecting the skeletal muscle and include inherited muscle pathologies such as Duchenne Muscular Dystrophy, Becker Muscular Dystrophy, FacioScapulohumeral Muscular Dystrophy, Limb-Girdle Muscular Dystrophy, Myotonic Dystrophy and skeletal muscle laminopathies. MDs have been associated with an increasing number of gene mutations involving structural proteins, signaling molecules and/or leading to aberrant mRNA processing or altered post-translational modifications. In the last few decades, many achievements have been made in clarifying the pathogenesis of these diseases. The development of omics technologies has provided a more far-reaching view of the biological mechanisms behind diseases and improved the development of adapted specific therapies. This issue will give recent insights into cellular, genomic and proteomic mechanisms that are primarily and secondarily disrupted in MDs, focusing on omics technologies and signaling mechanisms causing muscle degeneration and regeneration, defects in muscle growth and the repair of skeletal.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology,
Institute of Nutrition and Food
Technology “Jose Mataix”,
Biomedical Research Center,
University of Granada, Avda.

Granada, Spain

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
