Deadline for manuscript submissions:

closed (30 November 2021)

Message from the Guest Editors

Natural products have gained widespread acceptance among consumers worldwide. Unlike conventional medications, natural products sold in the form of dietary supplements are not required to undergo pre-market approval testing for safety; thus, the toxicity potential of such products is not realized until after their ingestion by the consuming public. This regulatory shortcoming is especially concerning with regard to unusual and heretofore untested combinations of exotic botanical extracts or purified phytochemicals. Of particular concern are hepato- and cardiotoxicity, as well as herb–herb and herb–drug interactions, which become especially concerning in lieu of the continuously growing number of natural products on the market.

Therefore, the development of novel molecular toxicology approaches and models that can effectively address these deficiencies is urgently required. In these regards, *in silico* approaches, microphysiological systems that mimic the complexity of human physiology and pathophysiology in an organ-specific context, and specialized animal models are of particular interest.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology,
Institute of Nutrition and Food
Technology “Jose Mataix”,
Biomedical Research Center,
University of Granada, Avda.

Granada, Spain

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
