Ireland, Dublin, Ireland

Deadline for manuscript  
submissions:

**closed (29 February 2020)**

### Message from the Guest Editor

Dear colleagues,

The study of ncRNA in human lung health and disease is an exciting and relatively new research area. A selection of miRNA and lncRNA have been found to have altered expression in certain lung diseases and some have been shown to contribute to the pathogenesis of specific lung diseases or disorders.

This Special Issue will publish original research and cutting-edge reviews on the topic of microRNA, long non-coding RNA and circular RNA relevant to human lung health and disease. Basic science, human translational research studies and therapeutic development projects will be welcomed. Studies using animal models will not be considered for this Special Issue.

Prof. Dr. Catherine M. Greene

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
