submissions:
closed (30 June 2020)

Message from the Guest Editors

Dear Colleagues,

Neuroimmunology represents the field that integrates cross-talk between the immune and nervous systems, but also expression of immune factors in the brain as well as neuroendocrine factors in the immune system. Interactions between the two systems during neurodevelopment, brain homeostasis and brain pathologies are the main interests for neuroimmunologists. The understanding of the role of immune cell infiltration as well as immune factor expression by neural and neuronal cells constitutes the basis of research into brain diseases in terms of their etiology, spreading, cognitive consequences and the possibility of pharmaceutical treatment. Among the major cells implicated in the neuroimmune response, microglia and astrocytes constitute the pillar of the physiological functioning of the nervous system. These cells act as the link and the sensors of the cognitive or brain pathogenic stresses. Environmental stressors are the major inducers of neuroinflammation that lead to brain disorders. Taken together, this Special Issue is dedicated to the recent research progress in neuroimmunology.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
