

## Nucleic Acid Nanotechnology

Guest Editors:

**Prof. Dr. Bernard Yurke**

Micron School of Materials  
Science and Engineering, Boise  
State University, Boise, ID, USA

**Dr. Reza Zadegan**

Department of Nanoengineering,  
The Joint School of Nanoscience  
and Nanoengineering, North  
Carolina A&T State University,  
Greensboro, NC 27401, USA

Deadline for manuscript  
submissions:

**closed (30 November 2018)**

### Message from the Guest Editors

Dear colleagues,

DNA nanotechnology, defined as the field in which the structure of DNA and its supramolecular interactions are exploited to organize and manipulate matter at the nanoscale, provides powerful tools for a variety of fields, such as synthetic biology, drug delivery, photonics, semiconductors, chemistry, biology, molecular computation, and data storage. The power of DNA nanotechnology arises from the simplicity of DNA structure and the predictability of its hybridization chemistry, and grows with advances in DNA synthesis, chemical functionalization and sequencing. Exploiting the combinatorial space of DNA sequences to program hybridization reactions and thereby control self-assembly, a variety of static and dynamic DNA nanostructures have been created. These include mechanical devices, molecular motors, molecular walkers, logic gates that perform in vitro, or in situ, and diagnostic agents (therapeutics and diagnostics). We are pleased to announce that scientifically valid and technically sound papers related to any aspect of nucleic acid nanotechnology will be considered for publication.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
