Message from the Guest Editors

Dear Colleagues,

Phenolic compounds constitute one of the most widely-distributed groups of substances in the plant kingdom. Nowadays, more than 10,000 different phenolic structures are currently known. In recent years, the study of phytochemicals from plants, compounds which possess beneficial effects on health, has been one of the main activities for the development of functional foods, nutraceuticals and pharmaceuticals. In this sense, the study of phenolic compounds has attracted attention due to the scientific evidence derived from a large number of epidemiological studies, which point to different biological activities attributed to these compounds. The most important effects of phenolic compounds include antioxidant, anti-inflammatory, hepatoprotective, antiviral and antimicrobial activities amongst others.

We invite researchers to contribute with original research articles, as well as review articles that will stimulate the continuing efforts to understand the role of the bioactive compounds in the treatment and prevention of cancer disease.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
