

## Patient-Derived Organoids in Personalized Medicine

Guest Editor:

**Dr. Zoltán Wiener**

Department of Genetics, Cell and Immunobiology, Semmelweis University, H-1089 Budapest, Hungary

Deadline for manuscript submissions:

**closed (31 December 2022)**

### Message from the Guest Editor

Although classical 2D cell cultures have provided a tremendous amount of data on how cancers and other diseases are established, they do not properly model the intra- and interpatient cellular heterogeneity, characteristic for the in vivo situation. In addition, some diseases are difficult to model with mouse systems. The 3D organoid technology is a promising tool to solve many of these problems; it captures much of the cellular heterogeneity of the original tissue, is genetically stable, and it represents the complex architecture of the epithelial tissue of origin well. Not surprisingly, this technology has become an invaluable tool in the study of stem cells and their niche, the effect of mutations for diseases, and in finding novel drug combinations for individual cancer patients. In this Special Issue, we welcome original articles and reviews about the application of organoids in disease modelling and drug testing, in understanding the development of tissues and organs, and about methodological advancements in organoid technology.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. José L. Quiles

Department of Physiology,  
Institute of Nutrition and Food  
Technology “Jose Mataix”,  
Biomedical Research Center,  
University of Granada, Avda.

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
