submissions:

**closed (25 February 2023)**

### Message from the Guest Editors

Dear Colleagues,

This SI will focus on current progress in understanding the role of the chromatin structure and modifications. The interest in this topic follows from the fact that eukaryotic genomes are packed into the supramolecular nucleoprotein structure of chromatin. Our understanding of processes, such as DNA replication and repair, transcription or cell differentiation, require understanding the structure and function of chromatin, and its specific domains.

Epigenetics is particularly important in plants that show a high developmental plasticity and, as in sessile organisms, display an enormous capacity to cope with environmental stress. Current advances in methodological tools have made it possible to investigate the chromatin structure, starting from its basic level, the nucleosome, up to the higher-order structures, and their dynamics associated with the differentiation and physiological status of cells. Thus, we aim to offer representative examples of research progress in this broad research field in this *IJMS* Special Issue, and invite original methodology and review contributions on this hot topic in plant sciences.

Prof. Dr. Jiří Fajkus

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
