Medical Faculty, Martin-Luther-  
University Halle-Wittenberg,  
Charles Tanford Protein Centre,  
Halle (Saale), Germany

**Dr. Monika Hämmerle**

Institute of Pathology, University  
Hospital Halle, Halle (Saale),  
Germany

Deadline for manuscript  
submissions:

**closed (31 August 2020)**

### Message from the Guest Editors

Dear Colleagues,

Recent proteome-wide studies have established a comprehensive catalogue of RNA-binding proteins (RBPs) whose functions are largely unknown. In general, RBPs can change the fate or function of their associated RNA cargo, which has significant implications for human diseases.

The goal of this Special Issue is to broaden our molecular understanding about the role of RBPs in human diseases as well as to highlight their potential to significantly contribute to personalized precision medicine efforts in the future. Hence, this Special Issue will feature target discovery strategies as well as novel developments in therapeutic and diagnostic approaches based on RBPs for disease detection and treatment, including the use of small molecules, nanomedicine, and biomaterials. We invite authors to submit their original research as well as review articles describing basic and translational findings with a special focus on RBPs and their role in human cancers, as well as cardiovascular and ageing-related diseases.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
