Yongin, Republic of Korea

Deadline for manuscript
submissions:

closed (28 February 2020)

Message from the Guest Editor

Rice (*Oryza sativa* L.) is not only a major staple food for the world's population, but also a model crop plant for studying the mode of action of agronomically valuable traits, suggesting ideas for application to other crop plants. The roots have a lot of essential functions, including the acquisition of water and nutrient and structural support. A molecular and genetic understanding of the mechanism to enhance abiotic stress tolerance in rice, a model crop plant, is very important for crop productivity. Advances in integrating omics studies using the genome, transcriptome, proteome, metabolome, and phenome will provide valuable insights to cope with the challenges of climate changes for crop plants.

Papers submitted to this Special Issue must report high novelty results and/or plausible and testable new models. This Special Issue includes studies involving physiological and chemical analysis of the transcriptome, proteome, metabolome, network, integrating omics, and abiotic stress tolerance crops through the improvement of root traits using natural variation, biotechnology and gene editing techniques. In addition, relating database issues are also welcome.

an Open Access Journal by MDPI

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
