Message from the Guest Editor

Accumulating evidence indicates that ncRNAs play an important role in cancer stem cell biology and cancer progression, acting as both suppressors or promoters during growth and metastasis. The high cell type-, tissue-, and disease-specificity of ncRNAs has shown, compared to protein coding mRNAs, to make ncRNAs particularly attractive as clinical biomarkers and putative therapeutic targets.

The present Special Issue is aimed at collecting latest advances and outstanding studies investigating the role of noncoding RNAs in the development and progression of cancer and exploring their possible implementation as biomarkers and putative therapeutic targets. Original research and review manuscripts are warmly welcome.

Keywords

- Noncoding RNA
- Solid tumor
- Cancer stem cells
- Invasion
- Metastases
- Epigenetic
- Drug response
- Gene expression regulation

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
