University, Leninskie Gory, 1-3,  
119991 Moscow, Russia

Deadline for manuscript  
submissions:

**closed (20 February 2025)**

### Message from the Guest Editor

Organic spiro derivatives are extremely attractive molecules for the development of novel structural types of biologically active molecules, and for the fabrication of new materials. The rigidity of spiro junctions in molecular frameworks makes it possible to fix the required spatial arrangement of exocyclic substituents, which are crucial to enabling with biological targets and the properties of developed materials. It is also vital that spiro-linked carbo- and heterocyclic compounds can be obtained via various types of cyclization reactions with high regio- and stereoselectivity, as well as atomic precision.

This Special Issue focuses on the synthesis and physico-chemical and biological investigation of spiro-conjugated organic compounds, and welcomes both original research articles and review papers addressing with both practical and mechanistic aspects of the preparation and reactivity of title compounds, as well as prospects for their possible application. In its Volume I, 10 papers were published. We sincerely encourage you to read these papers and welcome your contributions to Volume II.

an Open Access Journal by MDPI

## Editor-in-Chief

Granada, Spain

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
