Deadline for manuscript  
submissions:

**closed (31 January 2018)**

### Message from the Guest Editors

Dear Colleagues,

Mice lacking tau can survive, reproduce and do not show neurodegeneration. On the other hand, tau modifications like phosphorylation, truncation, or aggregation may induce a gain of toxic function, resulting in the appearance of tauopathies (being the most relevant Alzheimer disease). In this Special Issue, we will focus on the loss of tau function(s) and on the analysis of toxic effects of modified tau.

Prof. Dr. Jesús Avila  
Dr. Félix Hernández

## Editor-in-Chief

### Prof. Dr. Maurizio Battino

Department of  
Odontostomatologic and  
Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of  
Medicine, Università Politecnica  
delle Marche, Via Ranieri 65,  
60100 Ancona, Italy

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
