Deadline for manuscript
submissions:

closed (15 September 2020)

Message from the Guest Editor

The field of translational control has really taken off due to pivotal discoveries in the last decade. Recently, many outstanding reports that extended the knowledge in several areas such as non-coding RNAs, RNA modification, RNA binding proteins, ribosome structure, development, stress response and diseases. These findings have occurred in conjunction with, or due to significant technological advances in the field of transcriptomics, proteomics and structural biology, coupled to bioinformatics. In particular, technologies derived from RNA-Seq, as well as proteomics progress, including nano mass spectrometry methods, have allowed large scale approaches in the field of translation. Ribosomal heterogeneity has also appeared as a new way to specifically translate different pools of mRNAs. Finally, translational regulatory elements have provided molecular tools to improve gene transfer, with an impact in the development of combined gene therapy to treat various diseases.

The Translational Control special issue in 2019 has been a full success. In this second volume, we welcome research articles as well as full reviews in the emerging areas of translational control.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of
Odontostomatologic and
Specialized Clinical Sciences,
Sez-Biochimica, Faculty of
Medicine, Università Politecnica
delle Marche, Via Ranieri 65,
60100 Ancona, Italy

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
