Deadline for manuscript submissions:

closed (16 June 2021)

Message from the Guest Editors

Dear Colleagues,

To date, no vaccines exist against many viral infections, nor are there effective therapeutic strategies to eradicate the related diseases. As demonstrated by recent discoveries regarding SARS-CoV-2, many viruses share similar mechanisms of action, although these can be different depending on age. An explanation could be found by analyzing the immune system mediators and studying the immunogenetic assets. What is their contribution? This Special Issue will collect and present reviews and original studies in an attempt to find answers to this question.

Papers could include and develop the following topics:

- The role of immunogenetics in the control of viruses that can easily spread through the worldwide population
- The role of specific immune system mediators in viral diseases that can easily spread through the worldwide population
- Case reports about interesting immunological responses to viruses that can easily spread through the worldwide population, as characterized from a molecular and biochemical point of view

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
