Message from the Guest Editor

In this issue, readers will find an overview of research on wound healing from different points of view, spanning from the molecular and biological aspects, wound care and treatment, to the role of immune innate response and tissue regeneration, also including burns, skin grafting, and infections. Additionally, other aspects must be considered, such as nutritional status, concomitant pathological, acute and/or chronic diseases, as well as recent achievements in local medications and closure techniques such as negative pressure therapy. The aim of this issue is to offer a general “landscape” of the delicate and complex process of wound healing.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
