Molecular Biological Insights from Imaging of Cancer in Fibrosis

Message from the Guest Editor

This Special Issue, titled “Molecular Biological Insights from Imaging of Cancer in Fibrosis”, focuses on the critical role that fibrosis imaging plays in advancing our understanding of cancer biology and facilitating the development of novel diagnostic and therapeutic strategies. Fibrosis, characterized by the excessive accumulation of extracellular matrix components, is a common pathological feature in many types of cancer and is closely associated with tumor progression, metastasis, and treatment resistance. This Special Issue brings together the latest research findings on the molecular mechanisms underlying fibrosis in cancer, as well as the advancements in imaging technologies that enable non-invasive assessment of fibrosis in vivo. By bringing together researchers from diverse backgrounds, including molecular biology, imaging sciences, and clinical oncology, this Special Issue fosters interdisciplinary collaboration and promotes the development of novel diagnostic and therapeutic strategies for cancer patients. We welcome contributions from authors on this research area.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
