Molecular Research on Ataxia

Message from the Guest Editor

Ataxias are a clinically and genetically heterogeneous group of neurodegenerative disorders characterized by the progressive impairment of motor coordination. While their clinical diagnosis has improved, the molecular underpinnings of many ataxias remain incompletely understood. Recent advances in molecular biology, genomics, transcriptomics, and epigenetics are providing unprecedented insights into the pathogenesis of ataxias. This Special Issue, “Molecular Research on Ataxia”, aims to gather original research and comprehensive reviews focused on understanding the molecular mechanisms underlying inherited and sporadic ataxias. Topics of interest include gene discovery, repeat expansion disorders, molecular disease pathways, RNA and protein biomarkers, epigenetic modifications, and the development of molecular as well as cellular models. We also encourage submissions exploring emerging therapeutic strategies, including antisense oligonucleotides, gene editing, and pharmacological approaches targeting disease-modifying pathways.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
