

## Special Issue

# Biomarkers of Treatment Response in Psychiatric Disorders

### Message from the Guest Editor

Psychiatric disorders are leading causes of chronic disability and are characterized by high clinical variability, high levels of relapses/recurrences, and unpredictable treatment response. In the context of the development of personalized medicine in psychiatry, it is important to improve patients' stratification but also to monitor response and compliance. For this purpose, deciphering the molecular mechanisms underlying treatment response in psychiatric disorders is essential. We are pleased to invite you to contribute to this Special Issue of the *International Journal of Molecular Sciences*. It will focus on recent research concerning the molecular mechanisms involved in treatment response and potential of biomarkers to predict treatment response in psychiatric disorders. High-quality manuscripts presenting original research or expert review articles on both human subjects and preclinical models will be considered. Research areas may include (but are not limited to) the following: genetic, epigenetic, and transcriptomic biomarkers. I look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
