

Special Issue

Chloroplast 3.0

Message from the Guest Editor

The new issue focused on chloroplasts is intended to continue with the successful quantity and quality of papers in the previous issue. Papers submitted to the second Special Issue must report high novelty results and/or plausible and testable new models. The molecular basis of the conversion of light to chemical energy in photosystems is a reference topic. In addition, the structure and function of other components of photosynthesis machinery, plastid genomics, plastid biogenesis and senescence, metabolism, reactive oxygen species, and membrane transport are also of interest, with a special emphasis on the gene level and evolutionary comparisons. Significant advances in chloroplast transformation are also welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
