Pathogenetic Mechanism of Hereditary Anemia

Message from the Guest Editors

Anemia affects 1.6 billion people worldwide, about 10% of these individuals are affected by rare anemias of which 80% are hereditary. In recent years, major progress in the understanding of the genetic basis and pathophysiology of hereditary anemias have been achieved. Nevertheless, the pathophysiology of most of the hereditary anemias is poorly understood and, in addition, the responsible gene has not yet been identified for all of them. This Special Issue on “Molecular Genetics and Pathophysiology of Hereditary Anemias” will include a selection of original papers and reviews focused on genetics and genomics, as well as cellular and molecular mechanisms of red blood cell physiology and pathology. The special issue will focus on hereditary anemias, in particular red blood cell membrane structural defects, red blood cell membrane transport defects, defects of erythropoiesis, enzyme defects, anemias related to iron metabolism defects; diagnostic approaches, epigenetics, functional genomics, genome editing, generation of cellular and animal models for red blood cell diseases, gene expression profiling of erythroid cells, and description of new pathophysiological mechanisms.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
