Novel Research of Neuroinflammation in the Pathogenesis of Alzheimer's Disease and Related Dementias

Message from the Guest Editor

The incidence of dementia continues to expand worldwide; however, there are currently no effective therapeutic strategies for this disabling neurocognitive disorder. Therefore, there is an urgent need to elucidate the underlying mechanisms and develop novel therapeutics for the effective treatment of dementia. Alzheimer's disease (AD) is one of the main causes of dementia, induced by amyloid- β accumulation and subsequent tau hyperphosphorylation in the brain, which results in neuronal injury and cognitive impairment. Furthermore, cerebrovascular amyloid- β deposition can cause vascular cognitive impairment (VCI). Various mechanisms are involved in eliminating amyloid- β from the brain, and one of them is microglial phagocytosis. Accumulating evidence has further proven the role of microglia in the pathogenesis of these diseases. Amyloid- β accumulation and tau aggregates induce microglial activation, thereby triggering inflammatory responses. Moreover, metabolic diseases such as type 2 diabetes and obesity, as well as aging, affect microglial function deleteriously and trigger neuroinflammation.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Inorganic Chemistry)
