

## Special Issue

# Stem Cell Research in Urological, Hepatological, and Ophthalmological Disorders

### Message from the Guest Editor

The Special Issue of the *International Journal of Molecular Sciences* on "Stem Cell Research in Urological and Ophthalmological Disorders" explores the latest breakthroughs in using stem cells and their secreted exosomes for tissue regeneration. It covers their therapeutic application in treating diverse conditions, including urinary incontinence, kidney dysfunction, and ocular disorders. The research highlights the regenerative potential of various stem cell types, such as human adult stem cells and induced pluripotent stem cells (iPSCs), emphasizing their ability to restore function in damaged tissues. The Issue delves into the intricate molecular mechanisms governing this process, examining key interactions between cells, proteins, and the extracellular matrix within the cellular microenvironment.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
