

Special Issue

Design, Synthesis and Biological Applications of Functional Compounds and Materials

Message from the Guest Editor

This Special Issue will primarily focus on the rational design and synthesis of the organic functional compounds and materials employed in the biological applications and will include (but are not limited to) discussions of drug development, administration and delivery, personalized healthcare and the monitoring of the parameters of biological objects and living bodies. The modern toolbox of synthetic chemistry provides extremely broad chemical diversity, and rational design plays an extremely vital role in the development of functional compounds and materials, increasing the win rate of the targeted synthesis. Approaches to the targeted synthesis of biological and other applications are also essential for the development of the functional compounds and materials. In this Special Issue, we welcome the studies devoted to the design of functional compounds and materials and synthetic approaches for the preparation of various classes, families and scaffolds of such materials. We are also interested in structure–property studies, examinations of biological activity and research into other functional applications of organic compounds and materials.

Guest Editor

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
