Nutrition, Epigenetics, and Diseases 2.0

Message from the Guest Editors

It has been largely reported that diets/nutrients may modify the epigenetic regulation of gene expression. Moreover, it is now well documented that they may play a key role in the pathogenesis/prevention of non-communicable diseases (NCDs), including cardiovascular diseases, metabolic syndrome, diabetes mellitus type II, and cancer. Thus, nutraceuticals may represent a valid prevention strategy for NCDs through epigenetic mechanisms. A very important emerging field in this context is the beneficial role that nutraceuticals may exert in NCD patients showing a higher risk of SARS-CoV-2 infection due to their compromised immune responses. In this case, it has been suggested that nutraceuticals may act through epigenetic modifications to normalize the expression of unregulated inflammatory/cytokine markers and lead to the enhancement of adaptive immune responses. We invite authors to contribute either original research articles or review articles to this Special Issue aiming to provide a comprehensive overview on the current knowledge about the role played by diet and nutrients as regulators of complex disease-related epigenetic modifications.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
