The Plasma Membrane-Cytoskeleton Interface

Message from the Guest Editor

The plasma membrane–cytoskeleton interface is the locus where receptors and signaling molecules (e.g., ion channels, G-proteins, and enzymes) are anchored to the membrane and intimately associated with the subjacent actin meshwork undergoing constant remodeling. In the current Special Issue, we invite reviews and research articles that address molecular events related to the dynamic changes of the plasma membrane–cytoskeleton interface. Any articles dealing with basic research, translational research, and clinical studies on the given topic are welcome.

Guest Editor

Dr. Jong Tai Chun

Department of Biology and Evolution of Marine Organisms, Stazione Zoologica Anton Dohrn, Napoli, Italy

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Inorganic Chemistry)
