

Special Issue

Rational Design and Application of Functional Hydrogels

Message from the Guest Editors

The goal of this Special Issue is to focus attention on the rational design and functionalization of hydrogels. We invite to contributions of reviews and/or original papers reporting new results about the building blocks design, network design and functional design of hydrogels as well as the applications in the field including cell culture, tissue engineering, interfacial adhesion, flexible electronics and so on. Hydrogels formed using various building blocks such as polymers, peptides, proteins, DNA/RNA and composites of them were all acceptable. Manuscripts that address recent advances in the design principle of hydrogels with special properties and approaches to endow hydrogels with new functions are especially welcome.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
