

## Special Issue

# Mechanisms of Light Stress and Light-Related Acclimation Processes

### Message from the Guest Editors

Light is indispensable for plants as an energy source. However, if the light intensity is too high or too light it acts as a stressor for the plants, and light stress occurs. Thus, high light intensity or even normal intensity under various biotic or abiotic stresses can induce oxidative stress because of the formation of reactive oxygen species in excess. On the other hand, a shorter period under high light intensity can lead to the acclimation of the plants to subsequent stress. During this process, the changes in the cellular redox environment will activate the protective mechanisms through the redox signaling pathways. Besides the changes in the intensity of the light, the modifications of its spectrum can be also stressful for plants and cause disorders in their physiological and biochemical processes. However, certain spatial and temporal alterations in the ratios of blue, red, and far-red components can be also beneficial and help the adaptation of the plants to the changing environmental conditions. This Special Issue will present and discuss the physiological, biochemical, and molecular biological processes during light stress and light-related acclimation in plants.

### Guest Editors

Dr. Gábor Kocsy

Agricultural Institute, Centre for Agricultural Research ELKH,  
Department of Biological Resources, 2462 Martonvásár, Hungary

Prof. Dr. Maria Müller

Institute of Biology, Plant Sciences, University of Graz, Schubertstraße  
51, 8010 Graz, Austria

### Deadline for manuscript submissions

closed (31 July 2020)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
