

## Special Issue

# New Frontiers in Musculoskeletal Tissue Repair and Tissue Regeneration

### Message from the Guest Editors

Along with pharmacological treatments, complementary therapies have gained increased attention due to their analgesic, anti-inflammatory, immune-modulating effects and promotion of specific processes involved in cartilage and bone regeneration. Likewise, new strategies for improving bone and cartilage regeneration by functionalization with natural compounds have recently emerged. This Special Issue intends to attract high-quality research on non-pharmacological approaches to MSDs to boost integration among researchers, practitioners, bio-engineers, and health scientists in the field. **Keywords**

- complementary therapies
- nutraceuticals
- osteoarthritis
- rheumatoid arthritis
- osteoporosis
- fibromyalgia
- ankylosing spondylitis
- chronic low back pain
- chronic degenerative lesions
- balneology
- nutraceuticals
- regenerative medicines

If you have an interest, a **10%** discount can be applied for your submission.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
