

Special Issue

Mammalian Reproduction and Diseases

Message from the Guest Editor

This Special Issue of the *International Journal of Molecular Sciences (IJMS)* aims to efficiently publish contributions to the research on all aspects of mammalian reproduction, development, and chronic diseases, etc. We encourage the submission of manuscripts that provide novel and mechanistic findings, which reveal significant advances in these fields. Topics include but are not limited to:

- Pre- and post-implantation development;
- Reprogramming;
- Assisted reproductive technology;
- Developmental origins of health and disease (DOHaD)

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
