Management, Karlsruhe Institute
of Technology, 76131 Karlsruhe,
Germany

Deadline for manuscript
submissions:

closed (15 August 2019)

Message from the Guest Editors

This Special Issue of *Informatics* welcomes submissions on the topic of security and privacy in the context of IoT, while focusing on the human aspect. IoT includes smart homes, which include devices such as digital assistance (e.g., Google Home and Alexa) and smart health, including devices such as fitness trackers. There are several aspects that are of high interest for this Special Issue. These aspects include:

- Investigations into the deployment of these solutions, especially studies related to the acceptability of these solutions.;
- Research into how humans are expected to interact with IoT devices to secure them, how they can be compromised,
- Research into how humans are expected to configure IoT devices to preserve their privacy, and perceptions of privacy-related IoT behaviours.
- Studies that reveal new security vulnerabilities or privacy violations facilitated by the design of the “human–IoT” interface.
- Studies on user awareness and perception of potential security and privacy threats and risks

We would like to include some solutions in our Special Issue: Those that address vulnerabilities and potential privacy invasiveness of IoT devices.

Message from the Editor-in-Chief

Informatics (ISSN 2227-9709) is an international, peer-reviewed, open access journal, which publishes original theoretical and empirical work on the science of informatics and its application in multiple fields. Our concept of Informatics includes technologies of information and communication as well as the biological, social, linguistic and cultural changes that initiate, accompany and complicate their development.

Informatics publishes regular research articles, reviews and short notes. There is no restriction on the length of papers, and we encourage researchers to publish their theoretical and empirical results in as much detail as possible. The scientific community and the public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [dblp](#), and [other databases](#).

Journal Rank: CiteScore - Q1 (Communication)
