Message from the Guest Editors

Dear Colleagues,

Computer programming is a complex and fascinating area. In the teaching–learning process, teachers face many difficulties in finding techniques and methodologies to facilitate the learning of languages and to foster problem-solving skills.

At the same time, students find it difficult to understand the subjects and do not feel motivated to continue pursuing their studies and achieve good grades.

This Special Issue will specifically focus on the new and innovative methodologies, best practices, trends, techniques, and tools toward improving the teaching–learning process of computer programming.

In this Special Issue, we are available to receive the selected best papers from the International Computer Programming Education Conference (ICPEC’2021), as well as other independent papers.

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

Journal Rank: [CiteScore - Q2](#) (*Information Systems*)
