Message from the Guest Editors

We encourage original submissions that either consider the characteristics of cybersecurity, cybercrime or propose innovative solutions to real-world scenarios. In particular, we encourage the submission of the articles offering research results, experimental solutions, and case studies and describe the current state of the art of cybersecurity. The submitted articles must discuss innovative research which has not been published nor is currently under review by other journals, conferences or books. Editors will make an initial assessment of the contributions, originality, and scope of all submissions. Papers that either lack originality and clarity in presentation or fall outside the scope of the Special Issue will not be sent for review, and authors will be swiftly contacted in such cases.

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.
