Prof. Dr. Heikki Topi
Computer Information Systems, Bentley University, Waltham, MA 02452, USA

Deadline for manuscript submissions:
closed (31 December 2023)

Message from the Guest Editors

Digital transformations are the norm. New business models based on disruptive technologies are evolving at pace. Managing technology has never been more complicated and is expected to be more challenging in the foreseeable future. This elevates the need for advanced information management. How can disruptive technologies. In most organisations, many professionals in information management still have a predominantly technical profile. This is beneficial in accessing the potential of emerging disruptive technologies. Information management professionals need to understand legal implications. These implications will not become less complex, as the increasing legal requirements and their complexity is a true barrier for digital transformations and the adoption of disruptive technologies. Information management must be able to engage with the legal representatives in the risk assessment of disruptive technologies, as well as in implementing and managing the disruptive technologies. For implementing and managing disruptive technologies, information management is responsible for compliance and plays an important role in risk management.

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.
Journal Rank: CiteScore - Q2 (*Information Systems*)
