Message from the Guest Editors

Dear Colleagues,

Modern approaches to information management include all organizational activities related to information (the acquisition of information, the custodianship and the distribution of that information, and its ultimate disposition through archiving or deletion). Such approaches are closely related to, and often overlap with, the management of data, systems, modern information technologies, social media, and – where the availability of information is critical to organizational success – strategy. This broad view of the realm of information management reflects the broad scope of our Special Issue.

This Special Issue invites papers covering a wide range of topics, ranging from information management to Smart Systems.

We accept both research papers and case studies based on robust and strict methodology with a substantial proportion of original (not published elsewhere) content.

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

Journal Rank: [CiteScore - Q2](#) (*Information Systems*)
