Deadline for manuscript
submissions:

closed (31 December 2020)

Message from the Guest Editor

Dear Colleagues,

A very evident application area in smart city research is indoor positioning and navigation. Indoor navigation requires specific technologies, since GPS becomes undependable and vague, and public information, like Google maps, is not available. Hence, potential applications should efficiently support a complete service life-cycle, which includes map creation, user positioning, path planning, fixed and moving obstacle avoidance, en-route assistance, etc. Further, potential apps should deal with a variety of indoor spaces, from home to public areas. In turn, potential technologies should encompass fixed and wearable sensors and classic and IOT networks. Finally, apps should serve both normal or disabled persons and interact appropriately.

Topics:

- Location-based services and applications
- Indoor maps and 3D building models
- Human motion monitoring and modeling
- Apps and technologies for disabled people
- Indoor navigation and tracking methods
- Self-contained sensors
- Wearable and multisensor systems
- Intelligent sensors and wireless sensors for smart cities
- Moving obstacle avoidance
- Building inspection and maintenance

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

Journal Rank: [CiteScore - Q2](#) (*Information Systems*)
