Deadline for manuscript  
submissions:

**closed (15 June 2024)**

### Message from the Guest Editor

Dear Colleagues,

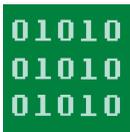

Text mining has emerged as a prominent field in data mining. From information retrieval, information extraction, and text classification to sentiment analysis and text summarization, text mining plays a significant role in several application fields. In recent years, various mining techniques have been developed, including rule-based and statistics-based models, support vector machines, clustering, neural networks, and deep learning. In each category, distance and similarity estimation has always been a key issue.

The aim of the Special Issue is to offer an opportunity to publish original research: cutting-edge theories, innovative algorithms, and novel applications. In particular, we welcome manuscripts from text summarization which has been commonly regarded as the most challenging area of text mining. Survey articles describing the state of the art are also welcome.

Topics include, but are not limited to, the following:

- Information retrieval and extraction;
- Question-answering systems;
- Recommendation systems;
- Security and privacy;
- Sentiment analysis;
- Text classification;
- Text summarization.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

## Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

**Journal Rank:** [CiteScore - Q2](#) (*Information Systems*)
