Technology, Lodz University of  
Technology, 90-924 Lodz, Poland

Deadline for manuscript  
submissions:

**closed (30 September 2023)**

### Message from the Guest Editor

Dear Colleagues,

Today, data and information are among the most important resources in various aspects of our life. Data and information are created, generated, collected, stored, and then processed and shared in various ways. All these activities are performed with the participation of contemporary software, applications, IT systems and their components.

Thus, in addition to creating the software itself, it is becoming increasingly important to manage the data and information that the software uses, processes and stores. Hence, it is extremely important not only the software itself and the process of its development, but also information management at the appropriate level, while maintaining a sufficiently high level of data protection, information and its flow.

Therefore, this Special Issue aims to show various aspects of software creation and development, designed for fast, easy and secure processing and management of data and information. The areas of this Special Issue are listed below:

- Software engineering
- Requirements engineering
- Data processing and management
- Knowledge management

## Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

*Information* is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

**Journal Rank:** [CiteScore - Q2 \(Information Systems\)](#)
