Message from the Guest Editor

Dear Colleagues,

From the beginning of this century, digitally coherent optical communication has developed into an important research direction. Coherent detection, with a large-bandwidth analogue-to-digital converter, digital-to-analogue converter and digital signal processing (DSP) has increased the achievable capacity of optical fiber communication systems.

Bandwidth demands are continuously growing. Circuit scaling technology is approaching its end due to fundamental limitations. Therefore, the energy-efficient design of DSP is necessary both from a sustainability and a technical perspective.

Meanwhile, DSP is playing a significant role in analogue fronthaul transport architectures such as 5G and beyond, achieving high spectral efficiencies, multiplexing/demultiplexing large numbers of channels, increasing flexibility, and reducing latency.

This Special Issue aims to present a new trend in DSP applications for various advanced optical communication systems and networks. Example topics of interest are the application of DSP in areas such as:

- signal processing;
- optical network;
- network management;
- machine learning.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

Journal Rank: [CiteScore - Q2](#) (*Information Systems*)
