Administration, Oslo University
College, 0316 Oslo, Norway

Deadline for manuscript
submissions:

closed (31 October 2022)

Message from the Guest Editor

This Special Issue invites contributions from theoreticians and practitioners, from academia and industry, on the infrastructure and methodology for real-time analysis of data with rich semantics. Papers should expose and marshal deep and self-critical questions about the meaning of data, uncertainties, and biases, especially in the context of the extended cloud, i.e., the “edge” of the Internet at the interface between physical and cyber realms. We appeal to a cross-disciplinary cohort of researchers with the highest standards of scientific depth and integrity; articles should write for a wide audience, placing subject and background on a proper historical footing, with a full set of references to help readers, and considering competing works (joint papers would be considered valuable). Authors are encouraged to think self-critically as well as ethically about all speculations, results, and applications of their work.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Willy Susilo

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compindex](#), [dblp](#), and [other databases](#).

Journal Rank: [CiteScore - Q2](#) (*Information Systems*)
